Source Control:

Github, Git

UI/UX Design:

Adobe Suite, Affinity Designer, Inkscape, Prototyping, Figma, Atomic Design, Wire-framing, UML Design

Education

University of South Carolina

To say that I love programming would be a big understatement. I love watching tech talks to discover new technologies and using what I learn to improve older project or implement into new ones.

I am most comfortable using the T3 (Next.js, Typescript, tRPC, Prisma, NextAuth.js, TailwindCSS) stack however I can adapt any part of the stack to accommodate your needs.

I also dabble in iOS development primarily using SwiftUI, and occasionally UIKit.

Experience

Job Title: Full-Stack Engineer
Company: Graphic Draft

Details

- Improved conversion rate of paying customers by 15% using A/B testing and user experience enhancements.
